DETAILED ACTION

This is a first action for application no. 90/853,508 filed on May 11, 2001 in which claims 1-33 are presented for examination.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 23-30 and 33 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.
[claims 23-30 and 33]

The claims are non-statutory because the claims represent abstract mathematical algorithms.

To expedite a complete examination of the instant application the claims rejected under 35 U.S.C. 101 (nonstatutory) above are further rejected as set forth below in anticipation of applicant amending these claims to place them within the four statutory categories of invention.

Claim Objections

Claims 6-10 and 17-22 are objected to because of the following informalities:
The claims are potentially non-statutory as the claims refer to computer code but not to computer code stored on a computer readable media. Without being stored on a physical media the code is an abstract idea. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-22, 31, and 32 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

[1-22, 31 and 32]

The independent claims (1,6,11,17,31 and 32) state the phrase "said BR1/BR a positive integer". The variable BR1/BR is not defined before this statement.
